## DOES ANYONE REMEMBER THE PREDICTIONS FROM THE 1990'S?

In 1988 I accompanied one of our large tour groups to an underground tunnel parallel to the Western Wall that at that time was not open to the public. The young Canadian Rabbi, Zvi, directed the tour and answered many questions from the group. That night he informed me that researchers had made a fascinating discovery. By feeding the Hebrew text of Genesis into computers and programming the computers to find words at certain distances, numerous "codes" were found. That night he made two statements that I remember well. First, that the book of Genesis contains the history of what will happen in the future and second that the leaders of Romania would be dead on a certain day in December. A week later the news came and I heard that the head of Romania was dead. It was on the very day the Rabbi predicted! I would later understand how this was a miniature Apocalypse whose stories will be repeated in some form in the future.

I began in chapter 11 of Genesis which is the story of the first global government at Babel and journeyed back through the pages of the Bible. I clearly saw how each of the 11 chapters pointed to an event to occur in the future. This passage includes the "signs of the days" in Genesis 6-8 and the translation of Enoch as a picture of the rapture of the saints in Genesis 5. The mark of the beast and tribulation in Revelation 13 and the mark on Cain's head and his seven fold punishment found in Genesis 4.

It was during the 1990's that I observed a 400 year cycle that was linked to the nations of Israel. A period of 400 years passed from the time of Abraham until the promise to bring Israel out of Egypt (Gen.15:13). At the conclusion of this cycle a king arose in Egypt who did not believe in God and the people were taken into captivity. Their sons were told to be killed after their birth which is similar to "partial birth abortion" but God allowed selective judgment to strike the land but preserved his people from its effects.

Years ago I researched a pattern of how ancient Israel and America were linked. I suggested that if this link continues the nation will introduce transition and change. The basic concept was that America's first colony, Jamestown, was founded in 1607 and 2007 years later. After continually emphasizing "change and transition," I was amazed during the 2008 presidential primaries to see Senator Obama say "CHANGE." Little did I realize other unexpected "changes" that we would experience in the nation; the huge bailouts of the banks and other institutions! Then there are the needs of the auto industry. We are now hearing that major corporations are lining up needing a bailout. Remember in the time of Joseph, there was a famine in the land and Joseph controlled the "bank" of his day. The people were losing their houses and possessions because of the famine. Is there a parallel here?

I have received numerous e-mails and letters from people asking, "What does Perry think will happen in the next 12 months of Obama's administration? Obama is leading the nation? I can only speak if I have a direct revelation or if I can find what seems to be a parallel pattern in scripture. I have found a possible pattern of what the President will eventually encounter during his administration. I am in the process of preparing to teach on this subject that will be released around the first of February. Be watching for this along with a new book that we are releasing this season. Our Manna-Fest program for the entire month of February will include the NEW programs recently taped in Israel! The teachers are many of our viewer's favorites and this new material is without a doubt a "right now word." It appears the change and transitions that

Sincerely,

Perry Stone, Jr.
