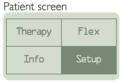
Provider setup

Philips Respironics Sleep Therapy System

Step 1: Set up device

Patient screen



Provider screen

To access provider screen:

1. In patient screen, highlight **Setup.**
2. Press and hold ramp button and control wheel simultaneously for 4-5 seconds until beep.
3. Provider screen then appears. Highlight **Setup** again and press control wheel.

To program device:

1. Turn control wheel to specific setting and press.
2. Turn control wheel to desired option and press control wheel to lock.
3. Turn control wheel to next setting and repeat.
4. To exit, turn control wheel to **Back** and press.

Menu options will vary based on device model being used. Refer to provider manual for complete description of each setting and option.

Note: the screen will automatically reset to patient mode after 60 seconds of inactivity.

Step 2: Verify setup

Provider screen

Patient screen

1. Turn control wheel to highlight **Exit** and press. You are now in patient screen.
2. Turn control wheel to **Therapy** and press.
3. Pressure will be displayed and device will start. (Auto CPAP will display min pressure)

Step 3: Set reminders

Provider screen

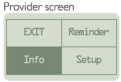
Return device to provider screen, then:

1. Turn control wheel to **Reminder** and press.
2. Turn control wheel to desired option and press.

3. Turn control wheel to **Back** and press.

Step 4: View information

Provider screen



In provider screen:

1. Turn control wheel to **Info** and press.
2. Turn control wheel to desired option and press to view information as identified.
3. To exit out of any option, turn control wheel to **Back** and press.

Waveform

Note: Flex options vary among models.

Step 5: Flex demo

1. From the patient screen, highlight **Flex**.
2. Press and hold ramp button and control wheel simultaneously for 4 to 5 seconds until beep. You are now in provider screen.
3. New screen appears with **CPAP** and **Flex** modes in each quadrant.
4. Turn control wheel to the specific mode you want to demo and press.
5. Device will auto start blower and deliver the selected mode. The screen will automatically cycle to display the waveform.
6. After 10 minutes of no action, device resets to patient screen and blower turns off.

Step 6: Undocking

Refer to diagram below. Hold entire unit at each end and slide release latch to the right.
